Christopher:

The site is going through a transition with a new owner. The new owner is Lazarus Energy and Blue Dolphin Energy. It appears that they will be using the same contractor, TRC, to manage site operations. I am waiting on a schedule from them.

Activities remaining include:

1. Removal of tank roofing structures to access the remaining K169 sludge in several tanks;
2. Treat and discharge contaminated rainwater;
3. Inspect tanks following removal of materials to determine if the tanks and tank bottoms have been compromised resulting in release to the soils below the tanks and removal and disposal of resultant contaminated soils.

I don't believe there is a huge amount of work remaining on the removal actions as it relates to off-site disposal. Additionally, an RI/FS is being conducted as well and it is yet to be determined if additional cleanup actions will be required.

I hope this helps. I can be reached at my cell phone below.

Thanks

Good afternoon Gary,

I just left you a voice mail @ 214-665-6609. I was hoping that you might be able to provide a project update on the removal work at the Falcon Refinery Superfund Site, in Ingleside, San Patricio County, Texas. US Ecology Texas, in Robstown, TX is where a number of loads were shipped. I am wondering if there is any future loads coming

9566942

to our site. Based on the Agreed Order you are the On-Scene EPA Coordinator, which is the reason I thought I would reach out to you. If you could please give me a call or let me know when is a good time to reach out to you, and I can call you at your convenience.

Thanks,
